

## **CRAZY CHROME** **M3699089**

This is a bright, ultra-reflective chrome coating with fine silver metallic flake/pearls. This product requires a clear topcoat. We recommend Acrylic Clear or Wheel Clear for the best finish.

Chrome powder coating requires a topcoat, and a clearcoat tends to dull the reflectiveness of the chrome. For the best chrome look, use our Acrylic Clear or Wheel Clear. This is the closest to the “real chrome look” when using powder coat.

BEFORE TOP COAT

### **FEATURES:**

- Contains fine metallic flake/pearls
- Great exterior durability (with clear topcoat)
- Ultra-reflective chrome finish
- High gloss
- Excellent option as a basecoat for candy/translucent colors
- Salt Spray: 500 hours pass (ASTM B-117)
