

FLIPPIN' PHOENIX CS1699065

This is a high gloss clear coating with a heavy amount of extra-large, multi-color "confetti" like metallic flakes. These extra-large flakes have a chameleon/color shift effect and change colors between red, copper, orange, gold, yellow, and green.

Main image base coat: Flat Black

NOTE: Flake distribution may vary based on powder gun system and powder delivery system used (hopper, vortex cup, box-feed, etc.). This coating may have a slight texture-like finish due to the extra-large flakes which may protrude through the clear finish.

CLEAR TOP COAT

FEATURES:

- UV stable
- Contains extra-large chameleon/color-shift metallic flakes
- Great for both interior and exterior conditions
- High gloss finish
- Black base coat recommended (is required to achieve look seen in product image)
