

## TEAL STEEL X1384087

This is a beautiful teal blue vein/texture coating with a unique silver inset. This coating has a high-gloss, vein-like finish. This product requires a clear topcoat for exterior use and frequent handling. We recommend Super Mirror Clear or Super Durable Wet Clear.

Tip: Vein powders are great coatings to use to hide small scratches/imperfections in metal. For best results, it is typically recommended to apply vein texture coatings thick.

### FEATURES:

- Beautiful teal blue color
- High hiding characteristics
- Contains a unique silver/chrome vein inset
- High gloss texture/vein finish
- Recommended Bake: 10 Minutes @ 400°F Metal Temperature
