

## ZINC PRIMER W3712020

This product serves as an excellent primer for epoxies and other powder coatings, offering exceptional chemical resistance and high-impact durability. It applies smoothly, just like other powders, while enhancing adhesion, improving surface quality, and minimizing issues like uneven surfaces and orange peel. Please note, it is not for use on aluminum.

**APPLICATION NOTE:** Be sure that you only do a **PARTIAL CURE** on this primer before applying your topcoat of powder. If you cure this epoxy-based Zinc Primer all the way, your topcoat **WILL NOT** adhere.

### FEATURES:

- High impact and chemical resistant
- Oil and fuel resistant
- Favorite for industrial applications
- Do not recommend putting in direct UV sunlight
- Very low gloss finish (0-10% gloss)
- Humidity: 2000 hours
- Salt Spray: 5000 hours pass (ASTM B-117)
